

2021 Northwood STEAM Showcase Winner's Interview Nhi (2nd Grade)

Project: Nhi's COVID-19 Information Center for Kids With Scratch Coding

Nhi is Northwood Elementary 2nd Grade, Mrs. Charif's Class student who was selected as the Grade Level Top Winner. Nhi likes to play with birds and she can let them stand on her hand. Nhi's dream job is to be an Ornithologist (a bird scientist). She also loves playing piano, reading books when she finishes homework. She also believes in magic, and Leprechauns.

What is your project and how long did it take to complete the project?

My project is a COVID-19 information center for kids to learn and play about COVID-19. It is deployed on the Scratch programming platform. It took about 2 months to complete.

What do you want to achieve in the real world with your project?

I want to make a safe, simple and fun website for kids to explore about COVID-19.

What is your next project plan?

I want to make more fun and easy games for kids to play using Scratch programming language.

Do you have any suggestions for students on how to be successful in the STEAM project?

Be creative. If you make random things, maybe it can come as a great result in the end.

Here is her project "Nhi's COVID-19 Information Center for Kids" Link.
